

Get started with image product search

Let's do a quick test! You must answer at least 3 questions correctly to pass this quiz.

[Return to pathway](https://developers.google.com/learn/pathways/get-started-image-product-search?hl) (https://developers.google.com/learn/pathways/get-started-image-product-search?hl

1. Fill-in-the-blanks

Enter one or more words to complete the sentence.

The Object Detection API returns a list for the class , each representing an object that it found in the input image.

- ☒ The Object Detection API returns a list for the class DetectedObject, each representing an object that it found in the input image.

2. The APIs for ML KIT all run ____, allowing for real-time use cases where you want to process a live camera stream.

☐ remotely

☐ virtually

☒ on-device

- ☒ The APIs for ML KIT all run on-device, allowing for real-time use cases where you want to process a live camera stream.

3. When creating an ObjectDetectorOptions instance with its Builder, there are several options to configure. Which of the following is not one of those options?

☐ Detector mode

☐ Detection mode

☐ Classification mode

☒ Destruction
mode

✓ ML Kit follows Builder Design Pattern in which you pass the configuration to the builder, then acquire a detector from it. There are several options to configure, including: detector mode (single image or stream), detection mode (single or multiple object detection), and classification mode (on or off).

4. Fill-in-the-blanks

Enter one or more words to complete the sentence.

"Reticle"

markers are circular, elevated indicators placed in front of the center of a detected object.

✗ Incorrect.

Results

You scored **3 out of 4**. Congratulations! You have passed this quiz.

You earned the **Get started with product image search badge**!

The badge has been added to your profile.
